Leverage Ratio			

Months of Operating Cash represents the number of months an organization can operate at current average monthly expense levels with existing cash and cash equivalents. $Cash + Cash\ Equivalents / (Total\ Expense / 12)$. The ratio is calculated using total numbers since this organization does not have a disaggregated balance sheet.

Total Working Capital consists of the resources available for operations, and in this report is calculated as total current assets minus total current liabilities since this organization does not have a disaggregated balance sheet. This calculation of working capital may differ from your internal calculations. Adequate working capital provides financial strength and flexibility to your organization, the ability to meet obligations as they come due, and the ability to take more risks, knowing there is a cushion to fall back on

Current Ratio (Current Assets divided by Current Liabilities) determines the organization's ability to pay current debt using current assets. The higher the ratio, the more capable the organization is of paying its obligations. The ratio is calculated using unrestricted numbers only.

Debt Service Impact (Total Debt Service including principal and interest divided by Total Expense) calculates the % of an organization's total expenses applied to the total debt-service burden, e.g. a mortgage). This measure can help understand the portion of the book value of an organization's fixed assets that they truly own free and clear of related obligations and depreciated value. It is calculated as $Unrestricted\ Net\ Assets - (Net\ Fixed\ Assets - Mortgage\ Debt)$.

Unrestricted Net Assets Net of Property, Plant and Equipment (Unrestricted Net Assets - (Net Fixed Assets - Mortgage Debt)) shows what the organization's unrestricted net assets would be if they did not own any property, or have any debts associated with that property. Because this calculation is based on unrestricted values for net assets and fixed assets, if an organization fills out a single column balance sheet and does not separate fixed assets into restricted and unrestricted categories, this value will be blank

Operating Margin (Change in Net Assets divided by Total Unrestricted Operating Revenue) is a measurement of the organizations efficiency in operating, highlighting the amount of an organization's surplus or deficit.

Depreciation as a % of Fixed Assets indicates the potential need for replacement or repair of fixed assets (such as buildings, furniture, office equipment, sets and props); especially significant for organizations that own a building or carry a long-term lease.

Leverage Ratio (Total Debt divided by Total Unrestricted and Temporarily Restricted Assets) is a measurement of a company's efficiency in operating.

Attendance
